

INSTITUTIONAL SCIENTIFIC COOPERATION AND QUALITY ASSURANCE PROTOCOL

University of Telafer

Neutrosophic Optimization and Intelligent Systems (NOIS)

Online ISSN 2997-0105 | Print ISSN 2997-0091 | Publisher: Sciences Force LLC

IDENTIFICATION OF THE PARTICIPANTS

UNIVERSITY: University of Telafer

Country: Republic of Iraq | Official website: <https://uotelafer.edu.iq/en/>

Institutional location: Nineveh Governorate, Iraq

JOURNAL: Neutrosophic Optimization and Intelligent Systems (NOIS)

Editorial representative: Prof. Huda E. Khalid, Editor-in-Chief (acting solely in her editorial capacity).

This Protocol sets out an academic cooperation arrangement between the University named above, represented by its President or a duly authorized delegate, and Prof. Huda E. Khalid in her editorial capacity.

1 PURPOSE AND SCIENTIFIC SCOPE

The University shall support independently documented academic advice and scientific quality assurance concerning the mathematical, methodological, computational and research-integrity standards of NOIS. This is a substantive advisory partnership, not a guarantee of the accuracy of every article.

2 COMMITMENTS OF THE INSTITUTIONAL PARTNER

The University shall formally designate a qualified scientific liaison; provide independent advice on the journal's academic scope and methods; participate in at least one documented quality review every twelve months of an appropriately selected sample of journal outputs and procedures; and issue dated findings and recommendations identifying limitations and priorities for improvement.

3 RESPONSIBILITIES OF THE EDITOR-IN-CHIEF

The Editor-in-Chief shall coordinate scientific consultations, facilitate access to non-confidential materials and lawfully authorized records, consider the written recommendations, and document proportionate follow-up. Research-integrity concerns shall be referred through an independent process. Her signature does not create a publisher contract or financial commitment on behalf of Sciences Force LLC.

4 EDITORIAL INDEPENDENCE AND EQUAL TREATMENT

Peer-review appointments and manuscript decisions remain the responsibility of authorized conflict-free editors and independent expert reviewers. The partner shall not approve or veto individual manuscripts, select reviewers in conflicted cases, guarantee acceptance, require citations, or obtain preferential publication for its members. Material interests shall be disclosed and managed.

IMPLEMENTATION, EVIDENCE AND AUTHORIZATION

5 DOCUMENTARY EVIDENCE AND ANNUAL ASSESSMENT

Each scientific review shall record its date, participants, sample selection, evidence examined, principal findings, limitations and agreed action points. The partner and editorial office shall retain authentic records of the appointment, meetings, scientific evaluations and responses. Confidential reviewer identities, manuscripts and personal information may be accessed only by persons lawfully authorized to do so. No activity shall be reported as completed before it has actually occurred.

6 ACCURATE INSTITUTIONAL REPRESENTATION

Only after valid execution and any necessary approvals may NOIS identify the University as an institutional scientific cooperation partner and describe its actual scientific responsibilities. The University does not become the owner, publisher, accreditor or legal guarantor of the journal. Use of its official logo or seal in public material requires authorization. This arrangement does not constitute Scopus indexing, approval or endorsement.

7 DURATION, AMENDMENT AND CESSATION

This Protocol becomes effective on the date of the later signature and remains in effect for two years, with annual evaluation. Modifications or extensions require written agreement by both signatories. Either side may end the cooperation upon sixty days' written notice. Public references to an ongoing partnership must be corrected after cessation.

8 AUTHORITY AND PUBLISHING RESPONSIBILITIES

The University confirms that its signatory has authority to approve this academic arrangement in accordance with applicable institutional rules. The Editor-in-Chief accepts coordination responsibilities in her journal role only. Sciences Force LLC remains the identified publisher and is not made a signatory to this Protocol. Nothing here transfers ownership, financial liability, intellectual property or final manuscript decision-making authority. Both sides shall make only truthful claims about their activities.

TWO-PARTY AUTHORIZATION AND SIGNATURES

FOR THE UNIVERSITY

University of Telafer

Prof. Dr. Abdul Aziz Ahmed Aziz

President of the University
